THE "Universal" Percolator excels all other ways of making coffee because the percolation is completed before the water boils. While the 'water is heating, it is continually pumped up over the

ground coffee in the top, percolating down through it into the pot again. Coffee made in the "Universal" is easily known by its delicious aroms, fine flavor, the absence of the bitter taste caused by boiling, and by the enjoyment with which those can drink it who cannot drink coffee made in any other way.

If you want to know what Perfect Coffee is like try the "Universal."
